---

## CEREER OBJECTIVE

I aim to build a strong and meaningful career by exploring web development and related growth opportunities. I am deeply committed to continuous learning, honing my skills step by step, and taking on challenges that allow me to grow both technically and professionally. My goal is to contribute to impactful projects, create real value through my work, and establish myself as a skilled developer capable of delivering innovative and effective solutions.

---

## SKILLS

- **Frontend:** Next.js, React.js, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)
- **Backend:** Node.js, Express.js, MongoDB, RESTapi, JWT, Firebase Authentication
- **Tools:** Git & GitHub, Vite, Axios, dotenv, Netlify, Vercel, Flgma
- **Soft Skills:** Quick Learner, Team Work, Time Management

---

## PROJECTS

### 1. RIDEX: Smart ride sharing platform (Team Project)

[Live Demo](#) [Git Repo](#)

RideX connects drivers and passengers in real time. It offers quick booking, live ride tracking, secure digital payments, and responsive trip management to ensure a smooth and reliable travel experience.

#### My Contribution:

- Integrated and managed the complete SSLCommerz payment system with full admin control.
- Developed the entire booking backend, including live tracking, nearest rider detection, and auto accept/cancel logic.
- Developed rider face verification and AI-powered admin blog features.

**Technology:** Next.js, React.js, Tailwind CSS, JavaScript (ES6+), Node.js, Express.js, mongoDB, firebase, JWT, Shadcn UI, socket io.

### 2. ECHONOW: Modern News Aggregator

[Live Demo](#) [Git Repo](#)

EchoNow is a modern full-stack news platform delivering trending and premium articles. It features real-time authentication, role-based dashboards, and secure payment integration.

#### Key Poinsys:

- Complete control to manage users, approve or decline articles, and assign publishers efficiently by admin dashboard.
- Secure subscription-based payment system with stripe payment for premium content access.
- Flexible content management allowing both free and exclusive articles for users.

**Technology:** React.js, Tailwind CSS, JavaScript (ES6+), Node.js, Express.js, mongoDB, firebase, JWT.

### 3. SHELFY: Library Management System

[Live Demo](#) [Git Repo](#)

ShelfyBook streamlines book tracking and borrowing for schools. It offers a user-friendly interface, real-time inventory updates, and secure operations for both students and staff.

#### Key Points:

- Perfect book managemants like add, update, borrow, and return books with real-time quantity tracking and borrow limits.
- Users can browse all books, view detailed information, and post comments or reviews on book.
- Filter books by category, availability, or search queries, with JWT-protected APIs for safe workflows.

**Technology:** React.js, Tailwind CSS, JavaScript (ES6+), Node.js, Express.js, mongoDB, firebase, JWT.
